

Securing energy supply - potential reuse of the gas infrastructure

Elisabeth Alne Hendriks, R&D manager

We deliver

Norwegian gas to Europe. Natural gas from Norway plays an important role in European energy supply. Millions of people depend on us doing our job – on us delivering – every single day.

Europe will be dependent on Norwegian gas for a long time

Alternative use of the gas infrastructure

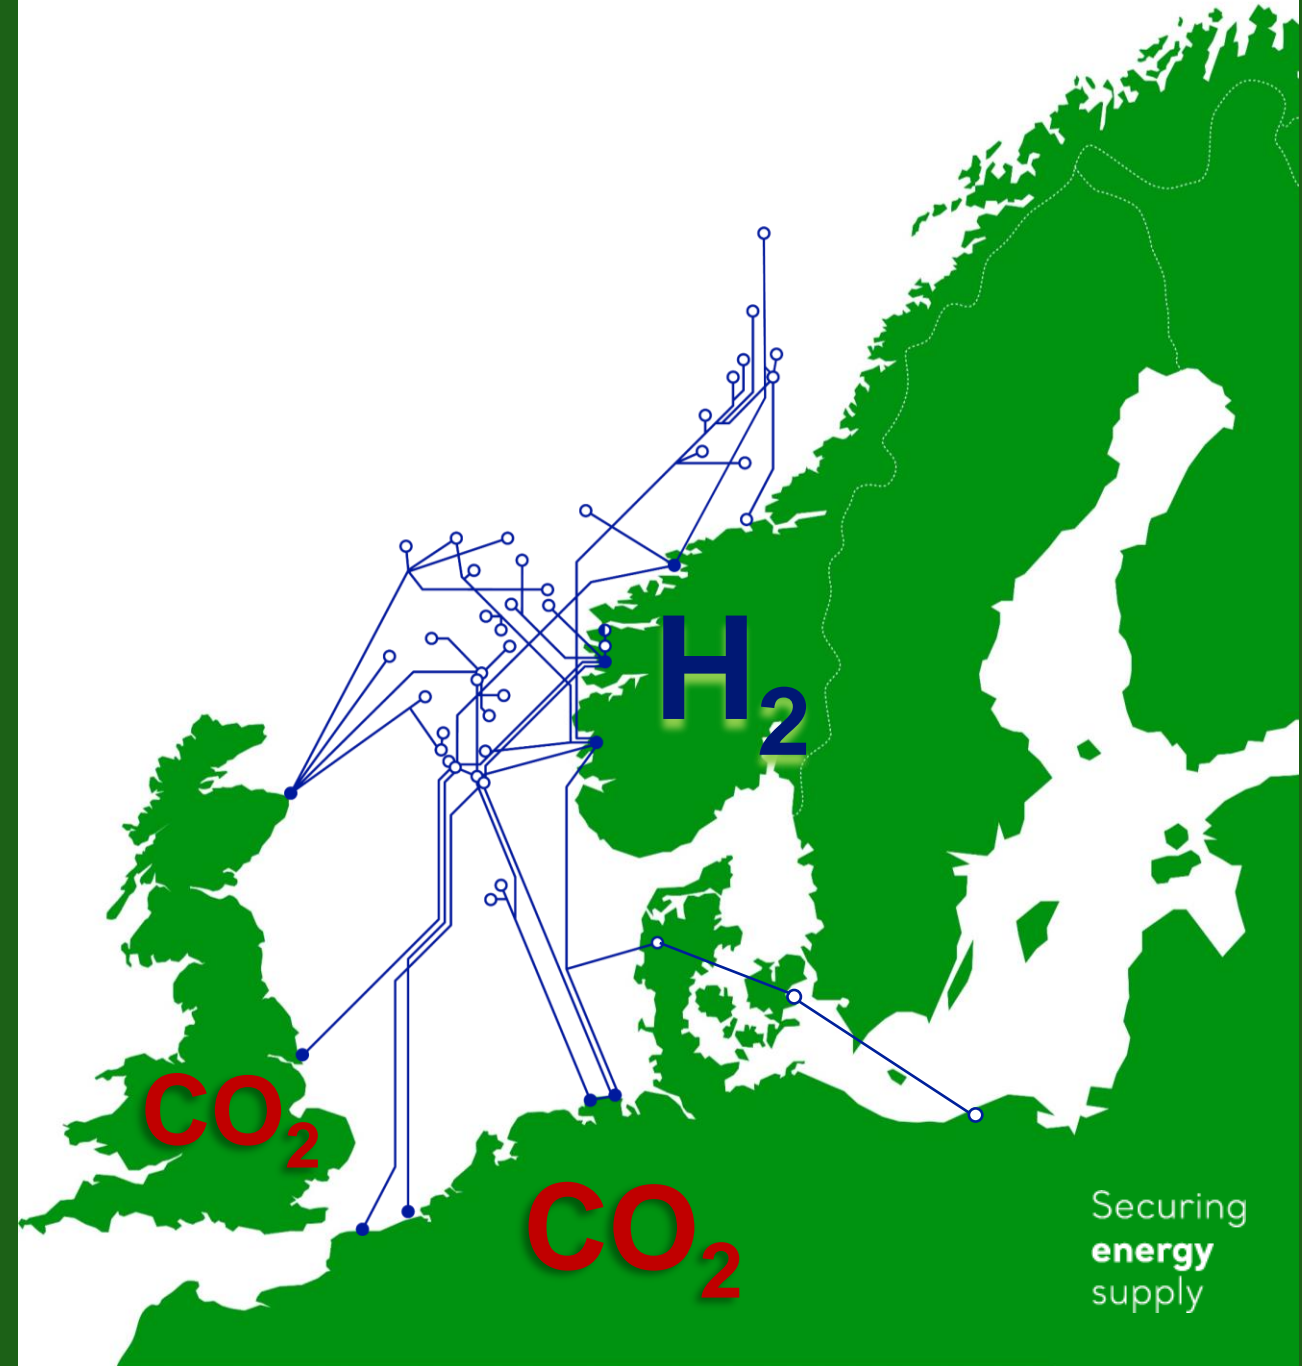

CO2 transport

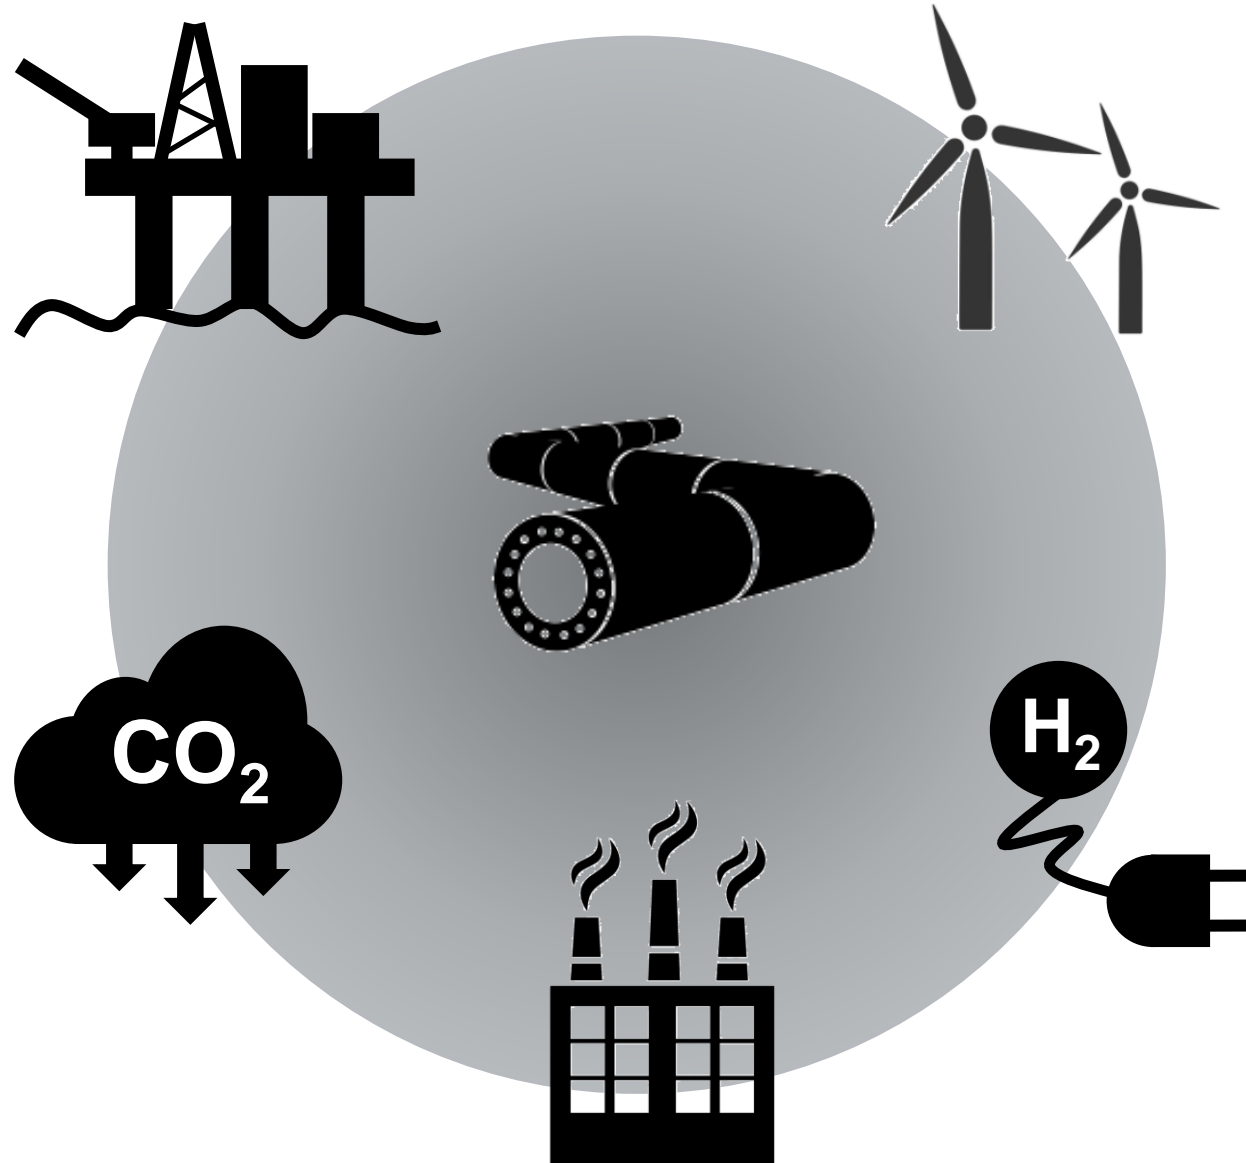

Hydrogen production and export

Sustainable

Development of the future Gas Infrastructure – Securing Energy Supply

Holistic system development in context to the total energy system

We deliver
